

# Percent Asian Population 2008

 City of Atlanta

## Pop. and Emp. Data

### % of Asians

Quintiles are Used

Using ESRI's model-based estimates, this shows, as of 2008, where the heaviest concentrations of the Asian population occur. As can be seen, Asians are heavily concentrated in Gwinnett and northern Fulton. Other notable areas attracting Asians include Clayton, eastern Cobb and northeastern DeKalb. And, once again, when compared to the other maps that focus on the Asian population, this shows that like races tend to cluster with themselves.
