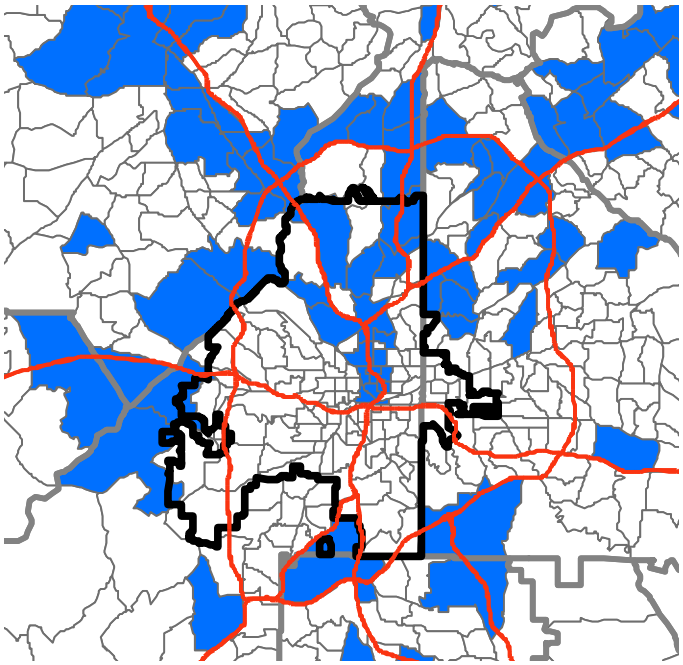
Area's Share of the Region's Employment 2008



City of Atlanta

Employment

Area's share of Total Employment

0% - 0.21% (Bottom of Top Quintile)

0.22% - 2.04%

Using the Atlanta Regional Commission's (ARC) employment estimates, this shows an area's share of the region's total employment. The areas in blue have the highest share of the region's employment (i.e. they are in the top 20% of all census tracts in terms of employment share). When comparing this map with the one that shows where the most expensive housing is, one can see a spatial mismatch of where the most jobs are located, and where the affordable housing is located.
